**Nitin Khanna MD and Dwight Tyndall named 341 spine surgeons to know in Becker's SPINE REVIEW**

**Chicago, IL, September 30, 2016 –**

Becker's SPINE in Chicago has named both Nitin Khanna MD and Dwight Tyndall MD as Leaders in the future of Spine Surgery. The list is compiled yearly and places them amongst the most prestigious spine surgeons from around the country "It is an honor to again be named to this list. We have worked hard in our region and nationally to advance minimally invasive spine surgery. Improving the clinical results and decreasing the morbidity historically associated with spine surgery is our mission statement. We have recently developed a center for cervical disc replacement. This gives patients an advanced option for motion preservation as opposed to just fusion and medications when treating cervical spine disorders" said Nitin Khanna MD, FAAOS, from Orthopedic Specialists of Northwest Indiana.

**For Release 9/30/2016**
